

## Short Pitch:

A personal portfolio that puts on display Meenu Sundararaju's skills and accomplishments.

## Long Pitch:

A personal website that allows recruiters to gain information about Meenu--from basic details like major and school, to proficiency with high and low level programming languages. This website will showcase Meenu's attention to UI while highlighting her programming projects and skills. Ideally, this website will relay to recruiters that I'm interested in working with data driven technology and am searching for an internship for Summer of 2017.

## Personas:

Technical Recruiter

--Uses website to measure technical ability

Computer Science Peers

--Pays attention to UI over content

## Comparables:
